DETAILED ACTION

Amendment

1. Acknowledgement is made of Amendment filed 3 November 2003.

Allowable Subject Matter

2. Claims 1-6 and 10-12 are allowed.
3. The following is an examiner's statement of reasons for allowance:

The record of prior art fails to teach an integrated circuit device having a memory area including a data memory having at least one counter element, and having at least one threshold value, wherein the counter element, on the one hand, counts at least one occurrence number of events occurring within the device and, on the other hand, can reach the threshold value, which is indicative of a large maximum number of occurrences of the events, wherein the data memory comprises at least two indicator elements residing at non-contiguous locations within the data memory, the indicator elements being associated with the counter element and being desired to go from a first state to a second state when the counter element has reached the threshold value.

Makino teaches an integrated circuit device having a memory area comprising a data memory, one counter element, at least one indicator element and at least one threshold value/level, wherein the counter element, on the one hand, counts at least one occurrence number of events occurring within the device and, and on the other hand, can reach the threshold value, which is indicative of a large maximum number of occurrences of the events, the indicator element being designed to go from a first state to a second state when the counter element has reach the threshold value. However, Makino fails to teach the data memory comprises at least two indicator elements residing at non-contiguous locations within the data memory, the
